## Windows & Shutters

- **Living room** The window on the right can be open fully or just tilted. This will tilt the window open, allowing for ventilation while still keeping the space secure. To open the one on the left, lift the red handle on the side up.  
Shutters are manual so just use the strap on the right of the window (behind the curtain). Pull down gently but steadily. Stop pulling once the shutter reaches the desired height or is fully closed.
- **Office** The smaller window on the left opens similarly to the one in the living room. You can open it fully or just tilt it for ventilation.  
The bigger window on the right opens by lifting the handle and **SLIDING** the windows to the right and left.
- **Bathroom** We recommend keeping it open for better ventilation.
